

Valuweigh ACCESSORIES

VWUSB-FDI USB Transfer Device

Store data directly to a USB memory stick from any indicator with a serial output. Quick and easy to use, the VWUSB-FDI stores transactions in csv format so that they can be opened straight into Excel. Each transaction can be saved with a time and date and consecutive number, providing complete traceability for every weighing.

VW Summing Boards

Summing Boards for platforms, weighbeams and weighbridges. Available in 2 cell, 4 cell or 8 cell configurations. Individual loadcell potentiometers make balancing corners quick and easy.

VW Loadcell Simulator

Ideal for service engineers and workshop testing of indicators. A convenient and reliable simulation of a loadcell, simply rotate the simulator and the resistance changes. Available with a D-connector or flying lead, the VW Loadcell Simulator features marked potentiometer positions for fixed mV outputs.

VWRB3 Relay Module

Relay module with 3 channels, plastic mountable housing and LEDs to indicate when a relay is switching. Available in 5V or 12V input and DC or AC outputs. Ideal for Cardinal weight indicators or any device requiring external relay switching.

VWMF Mounting Feet

The robust VWXtraMF is a free motion, height adjustable mounting foot manufactured from tool steel with a tough rubber base. The VWXtraMF features a standard M12 thread. Also available is the tough VWMF mounting foot in hard or soft rubber.

VWJB Junction Box and Summing Board

The VWJB comes complete with a Valuweigh Summing Board and plastic glands. Available in 2, 4 or 8 cell versions, the summing board features strong push down connectors making cable insertions quick and easy. The junction box is manufactured from tough plastic and is IP65 rated.

Also available, Cardinal Stainless Junction Boxes and Stainless Free Motion Feet, Long and short range RFID cards and keyfobs, wireless communications, Ethernet converters, proximity sensors and more. Please contact us for details.
